EDUCATION

Purdue University

Bachelor of Science in Aeronautical and Astronautical Engineering (GPA: 3.74/4.0)

Specialization in Aerodynamics and Systems Design

Honors: Dean's List and Semester Honors for **every** semester, **AAE Ambassador**

West Lafayette, IN

Expected May 2026

SKILLS

Core Tools: Technical Writing, CAD, Assembly, CREO, NX, GD&T, Teamcenter, Ansys, Manufacturing, JIRA

Programming & Analysis: System Integration, MS Office, Python, MATLAB, Git, CFD, Simulink, FEA

Soft-skills: Analytical, Communicator, Detail-oriented, Fast-paced learner, Inquisitive

PROFESSIONAL EXPERIENCE

Siemens USA

Mechanical Engineering Intern

Grand Prairie, TX

May 2025 – Aug 2025

- Designed custom enclosures for panelboards using **CREO** and executed ECNs in **SAP**.
- Streamlined **100+** switchboard neutral assembly configurations by resolving edge case designs.
- Automated BOM generation with **Python**, cutting manual processing time by **~30%** for **10+** orders/day.

Purdue School of Aeronautics and Astronautics

Undergraduate Teaching Assistant – Aerospace System Design

West Lafayette, IN

Jan 2026 – Present

- Organized the course through automation of team selection process on **HTML** and backend changes.
- Graded industry mimicked **SoSAR, SRRs, SDRs** for **7 teams**, providing presentation feedback.

Undergraduate Teaching Assistant – Intro to Aircraft and Spacecraft Design

Jan 2025 – Dec 2025

- Led study sessions to teach **50+** students, core **AAE 251** course material.
- Provided personalized support to students with concepts and **MATLAB** troubleshooting.
- Guided students in understanding key design principles for the aircraft and spacecraft design project.

Resilient Extraterrestrial Habitat Engineering

Undergraduate Research Assistant - Systems Engineer

West Lafayette, IN

May 2024 – May 2025

- Analyzed **18** potential disruptions scenarios in a lunar habitat through conducting **Simulink** simulations.
- Performed trade studies to evaluate safety controls, optimizing **habitat resilience** while minimizing **costs**.

PROJECTS AND INVOLVEMENTS

Next-Gen Carrier-Based Military Aircraft Design

Project Engineer

West Lafayette, IN

Jan 2025 – Present

- Generated an aircraft configuration to submit as an **RFP** to **AIAA** for Aircraft Design Competition
- Selected aircraft powerplant and performed inlet sizing on **MATLAB** based on my selected configuration
- Performed multi-variable **trade studies** to balance performance, weight, and drag, ensuring system-level mission requirements were achieved.

SAE Aero Design

Chief Engineer / Project Manager

West Lafayette, IN

May 2025 – Present

- Spearheaded a wind-tunnel test campaign to analyze control surface authorities and drag prediction.
- Documented past failures from the SAE Aero Design Regular Class to avoid recurring errors.
- Authored a **75-page** RC aircraft design guide to accelerate onboarding and designing an onboarding project.
- Created and managed a business team to bring in **3** sponsors, create a club website and expand the club.

Purdue Space Program – A SEDS Chapter

Satellites Deputy Systems Director

West Lafayette, IN

Feb 2024 – Nov 2024

- Improved project progress with **~15** engineers and other sub-teams ensuring alignment with project goals.
- Formulated, reviewed, and refined **200** project and system-level requirements for Boiler Bus.
- Manufactured** the satellite frame end plates using **CAM** and walls through **laser cutting**.

Purdue Aerial Robotics Team

Competition Airframe

West Lafayette, IN

Oct 2023 – May 2024

- Performed analysis using XFLR5 to select optimal airfoils, improving lift-to-drag efficiency by **~10%**.
- Engineered aircraft parts for the AUVSI SUAS competition through **NX** and Teamcenter with **~30** engineers.
- Applied engineering solutions to resolve manufacturing issues of molds, carbon fiber, and internal structures.

RESEARCH PUBLICATIONS

- Co-authored “A Modular MDO Framework for Rapid Electric Aircraft Design” for AIAA Aviation 2026
